EDUCATION

University of Petroleum and Energy Studies (UPES), Dehradun — Expected May 2028

B.Tech in Computer Science

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Scala, Kotlin, SQL, Dart, Java

Frameworks: React, Next.js, Node.js, Express, FastAPI, Flask, React Native, Expo, Three.js

Tools & DBs: Git, Docker, Firebase, Supabase, MongoDB, PostgreSQL, Cloudflare Workers

EXPERIENCE

React Developer Intern | Sentienta QualityAI — Jun 2025 – Aug 2025, Jun 2026 – Present

- Enhanced enterprise layout usability for 500+ daily active users by redesigning the core web infrastructure using React and Tailwind CSS.
- Accelerated internal QA workflows by architecting and deploying 8 highly responsive, data-intensive QA interfaces.

Full Stack Developer | BuildXLayer — Nov 2024 – Apr 2025

- Reduced average database query execution time by 40% by implementing strategic MongoDB index optimization and schema redesigns.
- Supported high-performance MERN stack applications with minimal latency by engineering robust RESTful backend APIs using Node.js and Express.

OPEN SOURCE CONTRIBUTIONS

Open Source Contributor | ZIO, Tari Aiteen, OWASP Nest — Feb 2026 – Present

- Enhanced platform stability by resolving critical CI regressions and modernizing core backend components within the ZIO/ZIO-Blocks ecosystem.
- Significantly reduced manual localization overhead by engineering a robust, automated i18n translation pipeline for Tari Aiteen.
- Engineered and merged critical core logic improvements into OWASP Nest, CircuitVerse, and TensorMap by resolving complex open architectural issues.

PROJECTS

MorphOS | *Next.js, Three.js, Framer Motion, Gemini 2.0 Flash Vision*

- Engineered a fully immersive, browser-based Generative Operating System capable of real-time application synthesis using WebGL shaders and LLMs.
- Achieved instant code generation from UI screenshots by implementing a multimodal visual compilation pipeline and native IDE subsystems.
- Built at the MLH AI Hackfest, demonstrating advanced spatial sandbox concepts and dynamic UI generation.

ColdEmailAI | *Next.js, Python, OpenRouter AI*

- Automated the generation of 10-15 highly contextual emails daily by integrating OpenRouter models to deeply analyze target company data.

- Improved B2B outreach efficiency by developing an end-to-end AI automation tool that intelligently researches and drafts personalized cold emails.

GradTrack | *React Native, Expo, TypeScript*

- Improved daily academic planning for university students by building a cross-platform mobile application to seamlessly track SGPA/CGPA trajectories and class attendance.
- Engineered a highly responsive, accessible cross-platform UI achieving native-like performance using React Native and Expo.
